

## **Installation Instructions Surface Applied Stair Treads**

### Prepare for Installation

1. Locate the packing slip(s) and shop drawings, if applicable.
2. Verify that all products listed on the packing slip are included in the package.
3. Check the products for damage. If products are damaged, report a freight claim immediately and leave the products in their packaging. If you sign for products without reporting damage you waive your right to a freight claim and will be responsible for their replacement cost.
4. Read the instructions thoroughly before beginning installation.

### Installation

A FLAT STAIR AND ACCURATELY INSTALLED TREADS ARE CRITICAL TO THE OVERALL PERFORMANCE OF THIS PRODUCT. AN IRREGULAR STAIR SURFACE OR IMPROPERLY INSTALLED TREADS COULD CAUSE TRIPPING HAZARDS.

1. Place the stair treads in desired locations and mark the holes.
2. Drill holes for anchors (provided).
3. Tap in anchors.
4. Put stair treads in place and screw them down (screws provided)

Maintaining a clean surface will aid in the long-term safety and performance of the stair treads. If treads get damaged, they can be replaced. Contact your representative or Arden Architectural for more information.
